1. General Notes:

- All business rules must be presented as a guide for data entry in each field (tooltip or hint). These should be displayed when hovering over the data field with the mouse.
- When opening any lookup list, the ability to search for a specific option by typing part of its name must be enabled, so that options containing the entered text are retrieved (autocomplete).
- An “All” option must be available in any lookup list that allows the selection of one or more items.
- When pressing certain buttons or links, the system must validate that all mandatory fields are filled in and that all data has been entered correctly. If not, warning messages should be displayed as specified in the table next to each data field.

Validation	Message
Missing entry in a mandatory field	Data entry is required in this field.
Incorrect data entry in violation of business rules	Please re-enter the data correctly according to the defined business rules.

2. Introduction:

- Background
Currently, the start-up is facing a huge challenge to reach the suitable investor to raise his start up value and money.
- Goals
